Made in Belgium

Celebrating our heritage and
ingenuity that defines this nation.

A badge of honour.

EN FACE

*It is not just about beauty for beauty's sake.
More crucial is that the creations are as nourishing as they are visually pleasing.
Both calming and energising. Balancing function with form.
Objects that engage all five senses and are imbued with understated luxury.*

Designed by Stephan Mees

GRAIL

*Sculptural in form – multidimensional.
Objects are a trigger for memories; when one is reminded of
a particular time in their lives, hears a song or smells a fragrance,
something delightful and surprising can be communicated.*

Designed by Stephan Mees

RENAISSANCE OF CRAFTMANSHIP

‘GRAIL’ designed by Stephan Mees

Sculptural in form – multidimensional.

Objects are a trigger for memories; when one is reminded of a particular time in their lives, hears a song or smells a fragrance, something delightful and surprising can be communicated.

GRAIL - Console Alabaster

The Grail collection is available in a console, wall or multiple pendant applications.

Translucent or not, up or downlighting, these fixtures give a homelike feeling while the material palette and lighting create an inviting environment.

Technical data sheet www.ROC-Lifestyle.com

ROC is a 100%LIGHT registered brand. 100%LIGHT reserves all rights to modify at any time design, technical specifications and manuals. 100%LIGHT is not responsible for printing mistakes. Please read all instructions carefully.

RENAISSANCE OF CRAFTMANSHIP

‘GRAIL’ designed by Stephan Mees

Sculptural in form – multidimensional.

Objects are a trigger for memories; when one is reminded of a particular time in their lives, hears a song or smells a fragrance, something delightful and surprising can be communicated.

GRAIL - Pendant I Down E27

The Grail collection is available in a console, wall or multiple pendant applications.

Translucent or not, up or downlighting, these fixtures give a homelike feeling while the material palette and lighting create an inviting environment.

THE FABULOUS

*The art of performing a difficult task
so gracefully that it looks effortless.*

Designed by Stephan Mees

RENAISSANCE OF CRAFTMANSHIP

‘THE FABULOUS’ designed by Stephan Mees

The art of performing a difficult task so gracefully that it looks effortless.

THE FABULOUS - 1500-1800

A duo of vase-like objects that stand alone on a beautiful crafted ring.

The weighted bottom provides stability, yet its rounded minimalistic shape gives the impression nearly touching the floor.

The most comfortable light is indirect.

These powerful stand alone up-lighters can be used in a broad spectrum of applications.

SIR DUKE

These strikingly simple modernist designs, inspired by histories of royalty, portray to the world a gentrified ambiance. The opulent look this provides, is seen as a way of standing out from the crowd.

Designed by Stephan Mees

RENAISSANCE OF CRAFTMANSHIP

‘SIR DUKE’ designed by Stephan Mees

These strikingly simple modernist designs, inspired by histories of royalty, portray to the world a gentrified ambience. The opulent look this provides, is seen as a way of standing out from the crowd.

SIR DUKE - 40 Wall Medium Xp

The objects are strongly geometric, offering a freedom of combinations and colourations. It demonstrates a certain signature of playfulness.

With multiple wall, pendant and floor applications, Sir Duke is an extensive range offering many lighting solutions.

RENAISSANCE OF CRAFTMANSHIP

‘SIR DUKE’ designed by Stephan Mees

These strikingly simple modernist designs, inspired by histories of royalty, portray to the world a gentrified ambiance. The opulent look this provides, is seen as a way of standing out from the crowd.

SIR DUKE - 40 Wall Medium Ribbed Glass

The objects are strongly geometric, offering a freedom of combinations and colourations.

It demonstrates a certain signature of playfulness.

With multiple wall, pendant and floor applications, Sir Duke is an extensive range offering many lighting solutions.

ROC is a 100%LIGHT registered brand. 100%LIGHT reserves all rights to modify at any time design, technical specifications and manuals. 100%LIGHT is not responsible for printing mistakes. Please read all instructions carefully.

LEDs & LEDFIXTURES 5 YEARS WARRANTY

THIS DOCUMENT IS CONFIDENTIAL AND PROPERTY OF ROC/100%LIGHT. MADE IN BELGIUM

RENAISSANCE OF CRAFTMANSHIP

‘ALLIES’ designed by Stephan Mees

Like friends you can trust, it helps to have allies.

Joining forces – A mutual benefit.

A visual philosophy and a symbolic language for not standing alone.

ALLIES - PM Round Base High

This trio of pendants created with minimal lines, playing on delicate curves achieved thanks to craft skills.

Keeping it as natural as possible, ensuring that ‘the grain’ is the star of the show.

Designed for spaces of great comfort and suggesting cosy atmospheres.

‘COLLECTOR’ designed by Stephan Mees

Being bold. A subtle rebellion against trend-driven.

Collector, A genre-spanning object, creating a silhouette as a modern statement piece.

Bold - Imaginative, challenging the conventional, an ultimate form of sophistication.

COLLECTOR - Backlit Small

Presenting the newest evolution of the ‘Collector’ – A bold, backlit version crafted in a single piece of solid material. The backlighting brings the collector’s shape to life. A subtle illumination transforming its silhouette into a dramatic contrast that feels alive and radiant. Its striking simplicity turns light and shadow into a captivating focal point. The Collector Backlit is designed for both interior and outdoor applications.

RENAISSANCE OF CRAFTMANSHIP

‘COLLECTOR’ designed by Stephan Mees

Being bold. A subtle rebellion against trend-driven.

Collector, A genre-spanning object, creating a silhouette as a modern statement piece.

Bold - Imaginative, challenging the conventional, an ultimate form of sophistication.

COLLECTOR - Pendant XXL 4400 Ribbed Glass - Triple Power Feed

CONVERSIONS

As a contradiction of keeping something in its original state, Conversions allow to create diversity and a broad spectrum of light applications by the simple act of altering the elements. Reform and customise by using the standard components. Stating that sublimation occurs when displacement is serving a useful purpose. We could say: 'A long-term conversion of the initial impulse.'

Designed by Stephan Mees

ROC is a 100%LIGHT registered brand. 100%LIGHT reserves all rights to modify at any time design, technical specifications and manuals. 100%LIGHT is not responsible for printing mistakes. Please read all instructions carefully.

LEDs & LEDFIXTURES 5 YEARS WARRANTY

THIS DOCUMENT IS CONFIDENTIAL AND PROPERTY OF ROC/100%LIGHT. MADE IN BELGIUM

RENAISSANCE OF CRAFTMANSHIP

‘CONVERSIONS’ designed by Stephan Mees

*As a contradiction of keeping something in its original state,
Conversions allow to create diversity and a broad spectrum of light applications by the simple act of altering the elements.
Reform and customise by using the standard components.
Stating that sublimation occurs when displacement is serving a useful purpose.
We could say; A long-term conversion of the initial impulse.*

CONVERSIONS - Trimless Semi-Recessed Large

A minimalistic lighting solution for both wall and ceiling applications.
Let the space do the talking.

RENAISSANCE OF CRAFTMANSHIP

‘CONVERSIONS’ designed by Stephan Mees

*As a contradiction of keeping something in its original state,
Conversions allow to create diversity and a broad spectrum of light applications by the simple act of altering the elements.
Reform and customise by using the standard components.
Stating that sublimation occurs when displacement is serving a useful purpose.
We could say; A long-term conversion of the initial impulse.*

DZINU

*A quiet glow, modest in gesture, yet full of soul.
Suspended by a single line, like a thought held in balance,
or composed in stillness against the surface,
it neither shouts nor begs for notice.*

Designed by 100%LIGHT

RENAISSANCE OF CRAFTMANSHIP

‘DZINU’

A quiet glow, modest in gesture, yet full of soul.

Suspended by a single line, like a thought held in balance, or composed in stillness against the surface, it neither shouts nor begs for notice.

DZINU - Surface Small

Elevated by restraint, this minimalist circular form reveals a quiet confidence, free of excess.

Its design eliminates all superfluous elements, prioritizing clean geometry and structural integrity.

Available in both pendant and surface versions, and offered in three sizes, this luminaire supports versatile applications — from intimate residential settings to refined commercial spaces.

Engineered with precision, it delivers both visual calm and enduring performance.

RENAISSANCE OF CRAFTMANSHIP

‘DZINU’

A quiet glow, modest in gesture, yet full of soul.

Suspended by a single line, like a thought held in balance, or composed in stillness against the surface, it neither shouts nor begs for notice.

DZINU - Pendant Medium

Elevated by restraint, this minimalist circular form reveals a quiet confidence, free of excess.

Its design eliminates all superfluous elements, prioritizing clean geometry and structural integrity.

Available in both pendant and surface versions, and offered in three sizes, this luminaire supports versatile applications — from intimate residential settings to refined commercial spaces.

Engineered with precision, it delivers both visual calm and enduring performance.

ALABASTER

‘A radiant tale of timeless beauty’

One of alabaster’s defining characteristics is its remarkable translucency. When delicately carved, it allows light to pass through, imparting a soft, warm glow that has captivated artisans across cultures and epochs. Ancient civilizations, from Egypt to Mesopotamia, embraced alabaster for its capacity to transform simple forms into masterpieces.

Cathedrals, mosques, and temples have been adorned with alabaster to imbue sanctuaries with a celestial radiance.

Composed primarily of calcite or gypsum, alabaster has been sculpted and treasured for millennia. Its story intertwined with the annals of art, architecture, and craftsmanship. Alabaster’s neutral palette, ranging from creamy whites to soft hues of beige and amber, contributes to its timeless appeal.

The purest alabaster is neutral white with practical no grain. More often it is associated with oxide of iron, producing brown clouding and veining. It is the intricate subtle variations of veins we admire most within the alabaster.

Whether carved into delicate features or embedded in the architecture of sentient spaces, alabaster continues to enchant, inviting us to witness the harmonious dance between light and stone that has unfolded across the canvas of human creativity.

ROC showcases the alabaster’s adaptability in contemporary design. The ethereal glow, complemented by the natural variations within the stone, transforms any space into a haven of serenity. The intermingling of modern design sensibilities with the ancient allure of alabaster creates fixtures that are both of-the-moment and enduring.

A true testimonial to a metamorphic rock that has graced art and design for centuries, inviting us to bask in the gentle embrace of its luminous charm.

TOBACCO ALABASTER

‘Away from the traditional’

Tobacco alabaster is a specific variation or type of alabaster that has a distinct colour resembling tobacco or shades of brown. This variation occurs due to natural impurities, inclusions, or mineral deposits present in the stone, giving it a different hue compared to the typical white or light-coloured alabaster.

The rarity of tobacco alabaster is linked to the specific geological formations and quarries where it is extracted. The limited number of the locations and extraction processes itself contributes to its scarcity and exclusivity.

‘In lighting, form is never just form.
It is function illuminated.’

RIBBED GLASS

‘Form with purpose - light with intention’

When glass is sculpted with intention, it becomes more than a medium; it becomes an active participant in the dialogue between light and space.

Ribbed glass with rounded, external curves pushes this dialogue further. Unlike conventional fluted or reeded glass with internal grooves and flat exterior, this design invites light to play across its outer convex surfaces, bending, reflecting, and magnifying it in dynamic ways.

Here glass is no longer passive. It transforms the quality of light, amplifying its presence and evenly dispersing its glow.

Every curve becomes a lens, catching and bending light like miniature prisms, multiplying reflections - every ridge a line of movement.

This is where craftsmanship meets clarity - where thoughtful design turns material into experience.

It is light not merely seen, but shaped.

Natural stones

Travertine Classico

Travertine Titanium

Travertine Rosso

Alabaster and marble are natural resourced materials.
Every single product has its unique difference in colour and veining.

Verde Italia Marble

Emperador Dark Marble

Grigio Carnico Marble

The background of the image is a close-up, high-resolution shot of a handcrafted textured coating. The texture is uneven and organic, with a range of light beige to off-white tones. The surface appears to have a fine, granular quality, with subtle ridges and valleys that catch the light, giving it a three-dimensional feel. The lighting is soft and directional, coming from the upper left, which emphasizes the tactile nature of the material.

Coloribus non est disputandum 'In matters of colours, there can be no disputes.'

In the realm of art and design, the diversity of opinions regarding colour choices is not only expected but celebrated. It is this diversity that contributes to the richness and variety in artistic expressions. All individuals are free to explore and experiment with colours, pushing the boundaries of conventional palettes and challenging preconceived notions.

Let us recognise and respect the diversity of colour preferences, understanding that in matters of colours, disputes need not arise – for beauty lies in the eye of the beholder.

ROC - Stepping out of the ordinary

UMT or 'Ultra Matt Textured'

Embracing elegance and sophistication. Choosing Ultra Matt Textured colours is not just a design decision; it is a commitment to a lifestyle that values subtlety, depth and a refined aesthetic. It is an acknowledgment that true beauty often lies in the understated, where the absence of excess becomes a canvas for authenticity and individuality.

Colour perception is related to an object's light absorption, reflection, emission spectra and interference. The physical colour of an object depends on how it absorbs and scatters light.

One of the remarkable qualities of UMT is its ability to absorb light, resulting in a soft, velveteen appearance. This boasts a richness that goes beyond the visual appeal. Its muted texture not only adds depth to colours, but also exudes a luxurious, tactile quality.

Beyond the visual and tactile aspects, UMT colours play a pivotal role in highlighting the subtleties of design.

Whether applied to minimalist interiors or intricate patterns, these colours have an uncanny ability to enhance the details without overshadowing the overall aesthetic. The absence of sheen allows other design elements to shine, creating a harmonious balance that speaks volumes about refinement.

In the world of fashion, matt colours make a bold statement, embracing both classic and avant-garde styles. From deep sultry burgundies to muted pastels, the matt finish adds a layer of sophistication that transcends trends. Fashion enthusiasts appreciate the versatility of it as they seamlessly transition from casual to formal, adapting to the mood and occasion with effortless grace.

As the design world continues to evolve, UMT stands as a testament to the enduring allure of simplicity and sophistication. Whether on canvas, a wall, or a piece of clothing, these colours elevate the ordinary to the extraordinary.
